LIMFNA DRENAŽA NOGU, STOPALA, TRBUHA I RUKU
LYMPHATIC DRAINAGE FOR LEGS, FEET, ABDOMEN AND ARMS

Aparativna limfna drenaža ili presoterapija potiče rad limfnog sustava koji u tijelu čisti međustanični prostor u kojem se zadržavaju nusprodukti metabolizma stanice. Obvezni je tretman u anticelulitnim programima te preventivno djeluje na umorne i teške noge i oštećenje cirkulacije. Ritmično napuhavanje zračnih komora u platnenim "čizmama" usmjerava i istiskuje suvišnu tekućinu iz tkiva te tako smanjuje edeme. Cjelokupni tretman dovodi do stanja opuštenosti, smanjenja natečenosti i ublažavanja boli koja je eventualno bila prisutna ranije.

Napomena: Preporučujemo ovaj tretman kao početak anticelulitnih tretmana.

Mechanical lymphatic drainage, or pressotherapy, stimulates the lymphatic system, which cleanses the intracellular space of the by-products of cell metabolism. It is an indispensable part of anti-cellulite programmes and has a preventive effect on swollen legs and impaired circulation. The rhythmic inflation of the air chambers in canvas 'boots' directs and removes excess fluid from the tissue, thus reducing oedema. The treatment leads to a state of relaxation and decreases swelling and pain that may have been present earlier.

***Note**: We recommend this treatment as the beginning of anti-cellulite treatments.*

OPI

Profesionalni brend za njegu noktiju prisutan je na tržištu još od 1981. godine. Brend koji prepoznaje potrebu svakog klijenta nudi kvalitetu i besprijekorne tretmane. Najveći suvremeni trend u manikuri i pedikuri je trajni lak, a naš wellness centar u svojoj ponudi ima najkvalitetniji profesionalni svjetski brand, OPI Gelcolor.

OPI Gelcolor trajni je lak prirodnog izgleda, čvrstoće i visokog sjaja. Poseban je po tome što nakon nanošenja ostaje na noktima i više od 14 dana. Tijekom tog vremena nokti ne mijenjaju oblik ni sjaj, a boja ostaje postojana kao prvoga dana.

This professional nail care brand has been on the market since 1981. Recognising the needs of each individual client, the brand offers impeccable high-quality treatments. The major trend in manicure and pedicure today is permanent nail polish: our wellness centre offers the world's leading professional brand, OPI Gelcolor.

OPI Gelcolor is a permanent nail polish with an natural look, strength and high gloss. It is special in that it remains on the nails for more than 14 days after application. During this time, the nails do not change their shape or shine, and the colour remains as vibrant as on the first day.

OPI TRAJNI LAKOVI

Postojanost trajnog laka individualna je i ovisi isključivo o brzini rasta noktiju. Bitno je naglasiti da se prilikom lakiranja i skidanja trajnog laka prirodni nokat ne istanjuje već trajni lak služi kao zaštita za nokat. Nokat ispod trajnog laka ostaje zaštićen od mehaničkih i kemijskih oštećenja te s vremenom postaje čvršći i otporniji. Trajnim lakom također je moguće spriječiti neugodno listanje i pucanje noktiju. Skida se vrlo jednostavno i nježno te se nakon manikure ponovno nanosi željena boja. Naš wellness centar u ponudi ima velik broj trajnih lakova te svatko može pronaći idealnu boju za sebe.

OPI PERMANENT NAIL POLISH

The durability of permanent nail polish varies according to the individual and depends solely on nail growth rate. It is important to point out that applying or removing permanent nail polish does not thin the nail. On the contrary, permanent nail polish protects nails, since they remain protected from mechanical and chemical damage and become firmer and more resistant over time. Permanent nail polish can also prevent unpleasant peeling and breaking of nails. It is removed easily and gently, and the desired colour can be reapplied after a manicure. Our wellness centre offers a wide range of permanent nail polishes, which means everyone can find their favourite.

Premium Luxury Private Spa

U svojim poznatim lječilištima s ugljenom kao izvorom topline, stari Rimljani koristili su sofisticiranu termo-hidrauličku tehnologiju za usmjeravanje tople vode te ozračavanje pare i topline kroz podove i zidove lječilišta. Znali su da odgovarajuća količina topline na različitim razinama vlažnosti ima pozitivan utjecaj na zdravlje te potiče osjećaj ugode i opuštenosti. Da bi se postigli ovi rezultati, Rimljani su osmislili složene arhitektonske strukture koje su se sastojale od raznih dvorana izloženih u specifično učinkovitom nizu. Raxul obnavlja i usavršava rimski spa ritual razvijanjem cjelovitog wellness koncepta kroz sve bioklimatske faze drevnih rimskih toplica.

KABINA RAXUL SASTAVLJENA JE OD PRIRODNIH ELEMENATA

Kamen, čelik, drvo i staklo vješto su spojeni kako bi oživjeli objekt iznimnog dizajna.

Prirodni materijali uz pomoć vode i topline stvaraju osjećaj bezvremenskog užitka i spokoja. Zidna obloga napravljena je od belgijskog plavog mramora, dok su sjedala izrađena od Botticino mramora s izvanredno izraženim jantarno obojenim žilama.

In their famous coal-heated spas, the ancient Romans used a sophisticated thermo-hydraulic technology to channel hot water and radiate steam and heat through the spa's floors and walls. They knew that the right amount of heat at different levels of humidity brings surprising health benefits and promotes a feeling of well-being and relaxation. To achieve these results, the Romans designed complex architectural structures consisting of various halls laid out in a particularly efficient sequence. Raxul recreates and perfects the ancient Roman spa ritual by developing a total wellness concept through all the bioclimatic phases of the ancient Roman spas.

THE RAXUL CABIN IS MADE OF NATURAL ELEMENTS

Stone, steel, wood and glass are all skilfully combined to bring to life an object of exceptional design.

These are natural materials which, with the help of water and heat, create a feeling of timeless pleasure and serenity. The wall panelling is made of Belgian Blue marble, while the seats are made of Botticino marble with prominent amber-coloured veins.
