By synergising spiritual and physical elements – through a unique ambience, an individual approach and specific programmes – we help you discover a newer, deeper sense of your body's well-being and health. Following the idea that a harmony of energies is needed to achieve feelings of calmness and relaxation, we have created unique ambiances based on the principles of Feng Shui and space design, in which you will feel different and relaxed.

The centre covers an area of 1,300 square metres over two floors. The first floor offers a fantastic view of nature and a variety of water facilities including a large heated seawater indoor pool with a length of 15 m and maximal depth of 1.70 m (water temperature 28°C). Here you'll also find three different saunas: Turkish, Finnish and Finnish eco. Sophisticated rooms for massages and other treatments are located on the upper floor. The interior's modern design leaves a long-lasting impression on visitors. The stunning outdoor pool is 25 m long and 2 m deep. Surrounded by nature and heated by the sun, it will surely meet all your expectations.

O.P.I PERMANENT NAIL POLISH

The durability of a permanent nail polish is individual and depends primarily on nail growth rate. It is important to point out that applying or removing permanent nail polish does not damage the nail. On the contrary, permanent polish protects the nail since it remains protected from mechanical and chemical damage and becomes firmer and more resistant with time. Permanent nail polish can also prevent the splitting and breaking of nails. It is removed easily and gently in less than 10 minutes, and a new colour can be applied after manicure. Our wellness centre offers a wide variety of permanent nail polishes in more than 40 hues, which means that everyone can find their favourite colour.

Price: **200 kn** (without manicure / pedicure)

NOTE: a manicure beforehand enhances the quality of permanent nail polish.

LYMPHATIC DRAINAGE FOR LEGS, FEET, ABDOMEN AND ARMS

Mechanical lymphatic drainage, or pressotherapy, stimulates the lymphatic system, which has the task of cleaning intracellular space of the by-products of cell metabolism. It is an indispensable part of anticellulite programmes. It prevents swollen legs and damaged circulation. The rhythmic blowing of the air chambers in the inflatable 'boots' directs and removes excess fluid from the tissue, which reduces oedema. The treatment produces a state of relaxation and decreases swelling and pain.

Price: **310 kn** (40 min.)

Note: we recommend this treatment as a starting anti-cellulite treatment.

ELECTROSTIMULATION

Muscle electrostimulation is a technique which contracts muscles using electric impulses. These stimulate the muscles in the same way as natural contraction through physical activity. Compex muscle stimulators simulate the same physiological effects on the motor nerves as those produced by the human brain, causing the muscle to contract. Since the muscle does not know where the signal that stimulates it comes from, the same desired effect is achieved. Muscle electrostimulation can be used for:

- improvement of competitive performance
- body shaping
- better and faster regeneration
- pain relief
- prevention of atrophy

COLD-PRESSED OILS

You can choose various cold-pressed oils as an addition to your massage. Your skin deserves the best from nature. In the cold pressing process, the mass of crushed seeds or fruit is pressed without additional heat at a maximum temperature of 40-50°C and is then immediately filtered through a coarse sieve and stored in bottles. Cold-pressed oils have a more intense scent and come in smaller amounts than other oils made from the same mixture.

Premium Luxury Private Spa

In their famous charcoal-heated spas, the ancient Romans used a sophisticated thermo-hydraulic technology to channel hot water and irradiate steam and heat through the spa's floors and walls. They knew that the administration of suitable quantities of heat at various levels of humidity produced a surprising amount of beneficial effects on the health and an overall sensation of well-being and relaxation. To achieve these results, the Romans designed complex architectural structures consisting of various halls laid out in a specifically effective sequence. Our Raxul cabin recreates in the correct sequence all the bio-climatological stages of the ancient Roman spa in a single room. Raxul renews and perfects the ancient Roman spa ritual by developing a total wellness concept through its special range of emotional cosmetics that amplify the positive vibrations generated by the cabin.

THE RAXUL ROOM IS MADE OUT OF NATURAL ELEMENTS

Stone, steel, wood and glass are all skilfully brought together to give life to an object with an extraordinary design. These are natural materials which, with the help of water and heat, generate feelings of timeless pleasure and serenity. The wall lining is made of Belgian Blue marble with its inimitable blue colour, while the seats are made of Botticino marble with extraordinary amber-coloured veins.
